

Ausgewählte Publikationen:

Wischmeyer E, Nolte E, Klocke R, Jockusch H, Brinkmeier H (1993). Development of electrical myotonia in the ADR mouse: Role of chloride conductance in myotubes and neonate animals. *Neuromuscular Disorders* 3: 267-274.

Karschin A, Wischmeyer E (1995). Identification of G-protein-regulated inwardly rectifying K⁺ channels in rat brain oligodendrocytes. *Neurosci. Lett.* 183: 135-138.

Wischmeyer E, Lentjes KU, Karschin A (1995). Physiological and molecular characterization of an IRK-type inward rectifier K⁺ channel in a tumour mast cell line. *Pflügers Archiv, Europ. J. Physiol.* 429: 809-819.

Wischmeyer E, Karschin A (1996). Receptor stimulation causes slow inhibition of IRK1 inwardly rectifying K⁺ channels by direct protein kinase A-mediated phosphorylation. *P. Natl. Acad. Sci. USA* 93: 5819-5823.

Wischmeyer E, Döring F, Wischmeyer E, Spauschus A, Karschin A (1997). Subunit interactions in the assembly of neuronal Kir 3.0 inwardly rectifying K⁺ channels. *Mol. Cell. Neurosci.* 8: 1-14.

Wischmeyer E, Karschin A (1997). A novel slow hyperpolarization-activated potassium current (I_{K(SHA)}) from a mouse hippocampal cell line. *J. Physiol.-London* 504: 591-602.

Wischmeyer E, Döring F, Karschin A (1998). Acute suppression of inwardly rectifying Kir2.1 channels by direct tyrosine kinase phosphorylation. *J. Biol. Chem.* 273:34063-34068.

Nehring RB, Wischmeyer E, Döring F, Veh RW, Sheng M, Karschin A (2000). Neuronal Kir channels differentially couple to PDZ proteins of the PSD-95/SAP90 family. *J. Neurosci* 20: 156-162.

Rajan S, Wischmeyer E, Liu G, Preisig-Müller R, Daut J, Karschin A, Derst C (2000). TASK-3, a novel tandem-pore domain acid-sensitive K⁺ channel: an extracellular histidine as pH sensor. *J. Biol. Chem.* 275: 16650-16657.

Rajan S, Wischmeyer E, Karschin C, Preisig-Müller R, Grzeschik KH, Daut J, Karschin A, Derst C (2001). THIK-1 and THIK-2, a novel subfamily of tandem-pore domain K⁺ channels. *J. Biol. Chem.* 276: 7302-7311.

Delling M, Wischmeyer E, Dityatev A, Veh R, Karschin A, Schachner M (2002). The neural cell adhesion molecule NCAM regulates cell surface delivery of G-protein activated inwardly rectifying potassium channels via lipid rafts, *J. Neurosci* 22: 7154-7164.

Döring F, Wischmeyer E, Kühnlein RP, Jäckle H, Karschin A (2002). Inwardly rectifying K⁺ (Kir) channels in *Drosophila*. *J. Biol. Chem.* 277: 25554-25561.

Döring F, Scholz H, Kühnlein R, Karschin A, Wischmeyer E (2006). Novel *Drosophila* two-pore domain K⁺ channels: rescue of channel function by heteromeric assembly. *Europ. J. Neurosci* 24: 2264-2274.

Renigunta V, Yuan H, Zuzarte M, Rinné S, Koch A, Wischmeyer E, Schlichthörl G, Gao Y, Karschin A, Jacob R, Schwappach B, Daut J, Preisig-Müller R (2006). The retention factor p11 confers an endoplasmic reticulum-localization signal to the potassium channel TASK-1. *Traffic* 7(2): 168-181.

Dobler T, Springauf A, Tovornik S, Weber M, Schmitt A, Sedlmeier R, Wischmeyer E, Döring F (2007). TRESK two-pre-domain K channels constitute a significant component of background potassium currents in murine dorsal root ganglion neurones. *J. Physiol.* 585 (3): 867-879.

Weber M, Schmitt A, Wischmeyer E, Döring F (2008) Excitability of pontine startle neurones is regulated by two-pore domain K⁺ channel TASK-3 coupled to 5-HT_{2C} receptors. *Eur J Neurosci* 28:931-940.

Zuzarte M, Heusser K, Reningunta V, Schlichthörl G, Rinné S, Wischmeyer E, Daut J, Schwappach B, Preisig-Müller R (2009). Intracellular traffic of the K⁺ channels TASK-1 and TASK-3: role of N- and C-terminal sorting signals and interaction with 14-3-3 proteins. *J. Physiol.* 587: 929-952.

Schmitt BM, Gorbunov D, Schlachtbauer P, Egenberger B, Wischmeyer E, Müller T, Koepsell H (2009). Charge-to-substrate ratio during organic cation uptake by rat OCT2 is voltage-dependent and altered after exchange of glutamate 448 by glutamine (2009). *Am. J. Physiol. Renal Physiol.* 296 (4): F709-722.

Kaufmann SG, Westenbroek RE, Zechner C, Maass AH, Bischoff S, Muck J, Wischmeyer E, Scheuer T, Maier SK (2009). Functional protein expression of multiple sodium channel alpha- and beta-subunit isoforms in neonatal cardiomyocytes. *J Mol Cell Cardiol.*, doi:10.1016/j.yjmcc.2009.04.017

Buchbeiträge:

E. Wischmeyer et al. (2009). Duale Reihe „Physiologie“. Kapitel: "Blut, Herz-Kreislauf" , Thieme Verlag.

E. Wischmeyer et al. (2010). Taschenlehrbuch Physiologie, Kapitel: "Vegetatives Nervensystem, Somatomotorik, Integrative Funktionen des Gehirns", Thieme Verlag, erscheint zum Sommersemester 2010.
